

vinylBrick façade panels!

With more than 25 million square metres of cladding materials sold enhancing the appearance of houses throughout Europe demonstrates our experience and competency. All façade systems from Vinylit are subject to on-going tests by national and international monitoring institution. Internal checks and clearly defined standards thus guarantee top quality and maximum durability.

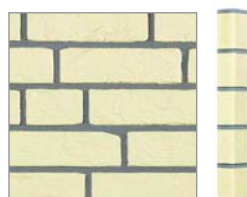

Curtain-type and back ventilated vinylBrick panels are not only pleasing to the eye but also provide an opportunity to apply a more cost effective long term solution to the issues of insulation, weatherproofing and ultimately retaining the long term value of your investment
